

```
import numpy as np

# Sample pixel values
pixels = np.array([0, 1, 3, 7, 15])

# Constant
c = 1

# Log transformation
log_values = c * np.log(1 + pixels)

print("Original pixels:", pixels)
print("Log transformed values:", log_values)
```

Original pixels: [0 1 3 7 15]

Log transformed values: [0. 0.69314718 1.38629436 2.07944154 2.77258872]
