

```
import numpy as np

# Sample 3x3 image region
image = np.array([
    [10, 20, 30],
    [40, 50, 60],
    [70, 80, 90]
])

# Calculate average
new_center = np.mean(image)

print("Image region:")
print(image)

print("New center pixel value:", new_center)
```

```
Image region:
[[10 20 30]
 [40 50 60]
 [70 80 90]]
New center pixel value: 50.0
```
